SAILOR 6000 VHF

Description: This eLearning course covers the product presentation of the SAILOR 6000 Series VHF. The course is not intended as taking the place of the User manuals supplied with the products, and also available for download from the Cobham SYNC partner site, but is rather aimed at providing an initial overview of the products and what is required to install, commission and set into operation. The course will take 25-30 minutes to complete. We hope you will find it helpful in your future working with the SAILOR 6000 Series VHF products. This concludes the eLearning course on the SAILOR 6000 series VHF Presentation and Operation part. We hope that the course has provided the general overview of operate SAILOR 6000 VHF radio products as it was intended. For further detailed information pertaining to the commissioning and operation refer to the relevant documentation in form of Manuals as referred to through the course. Thank you for taking the time to do this eLearning course!

SAILOR 6000B-series MF/HF Update training

Description: Though being of interest to any technician dealing with the SAILOR 6000B-series MF/HF product this eLearning course is aimed at those who have already attended the SAILOR 6000-series GMDSS Installation & Commissioning and/or SAILOR 6000-series MF/HF Onboard Repair class training courses prior to July 2015. The course takes the reader through the main differences introduced with the SAILOR 6000B-series MF/HF as compared to the SAILOR 6000A-series MF/HF. For the Silver or Gold rated Technical Service Partners this eLearning course will upgrade those of their technicians who have attended SAILOR 6000-series MF/HF Onboard Repair class training course prior to July 2015 to additionally comply with the SAILOR 6000B-series MF/HF training requirements.
